

Complete Your Businessworks Solution

With an Applianz System From Northbrook Consulting Group, Inc

Applianz Mid-Market Series

IMAGINE accessing Businessworks instantly from all of your locations and key employees working from home or on the road

IMAGINE your mission-critical data being backed up nightly to a secure off-site location

IMAGINE a lifetime system replacement guarantee (with CompleteAssurance)

IMAGINE all the PCs, Macs, server, firewalls, remote access and Windows licenses bundled together in one easy, simple box that sets up in minutes.

IMAGINE your business back up and running in less than a day in the event of a business interruption

IMAGINE no more. The Applianz system is a revolutionary solution that makes installing sophisticated business software like Businessworks as simple as plugging in a network device and following 3 easy screen prompts.

Our CompleteServer™ Technology creates a business network entirely in software; saving you money and making your business more profitable. By purchasing a pre-configured Applianz system you avoid the business disruption and expense usually associated with a new software roll-out.

Applianz systems virtually take care of themselves. With our CompleteAssurance™ Service Protection Plan, new features and security updates are tested and automatically installed on your system, keeping your Businessworks running smoothly and efficiently. And with CompleteAssurance, you get automatic offsite backups for the first 12 months at no additional charge.

IMAGINE all this and more for your business. Call Don Joseph at Northbrook Consulting Group, Inc today at 847-835-0979 and ask about a Businessworks solution on an Applianz system for your business.
